

Cloud adoption made easy

Let Synthesis help you take flight

Cloud adoption is a major focus for South African businesses in 2021.

The eight business drivers:

1. Cost reductions
2. Agility and staff productivity
3. Improved security & operational resilience
4. Hardware/software end of life
5. Data centre consolidation
6. Digital transformation
7. Going global quickly (mergers & acquisitions)
8. New technologies (AI/ML & IoT)

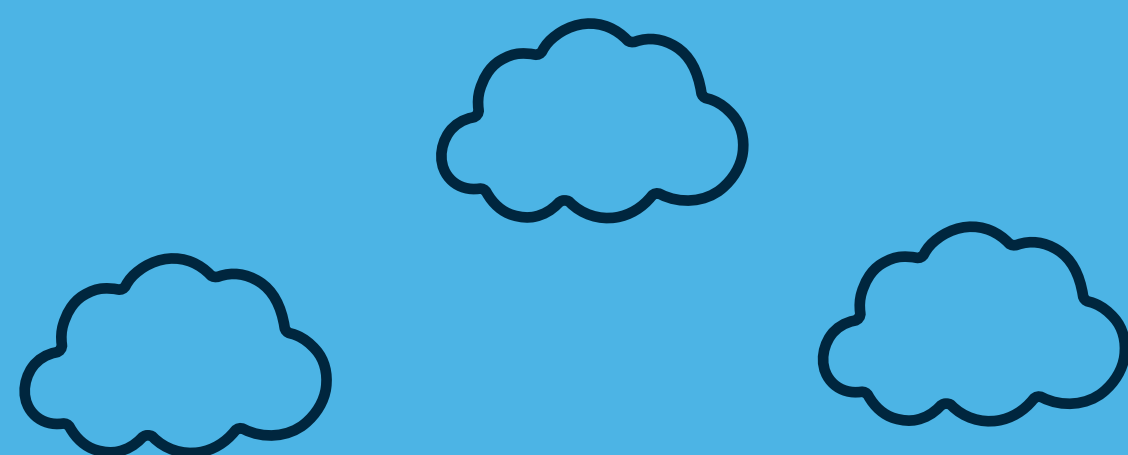

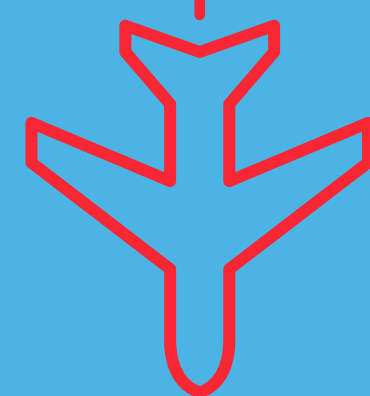

**Covid-19 amplified this adoption.
Cloud spending in the first quarter
of 2020 rose 37% and this spend
is drastically increasing this year.**

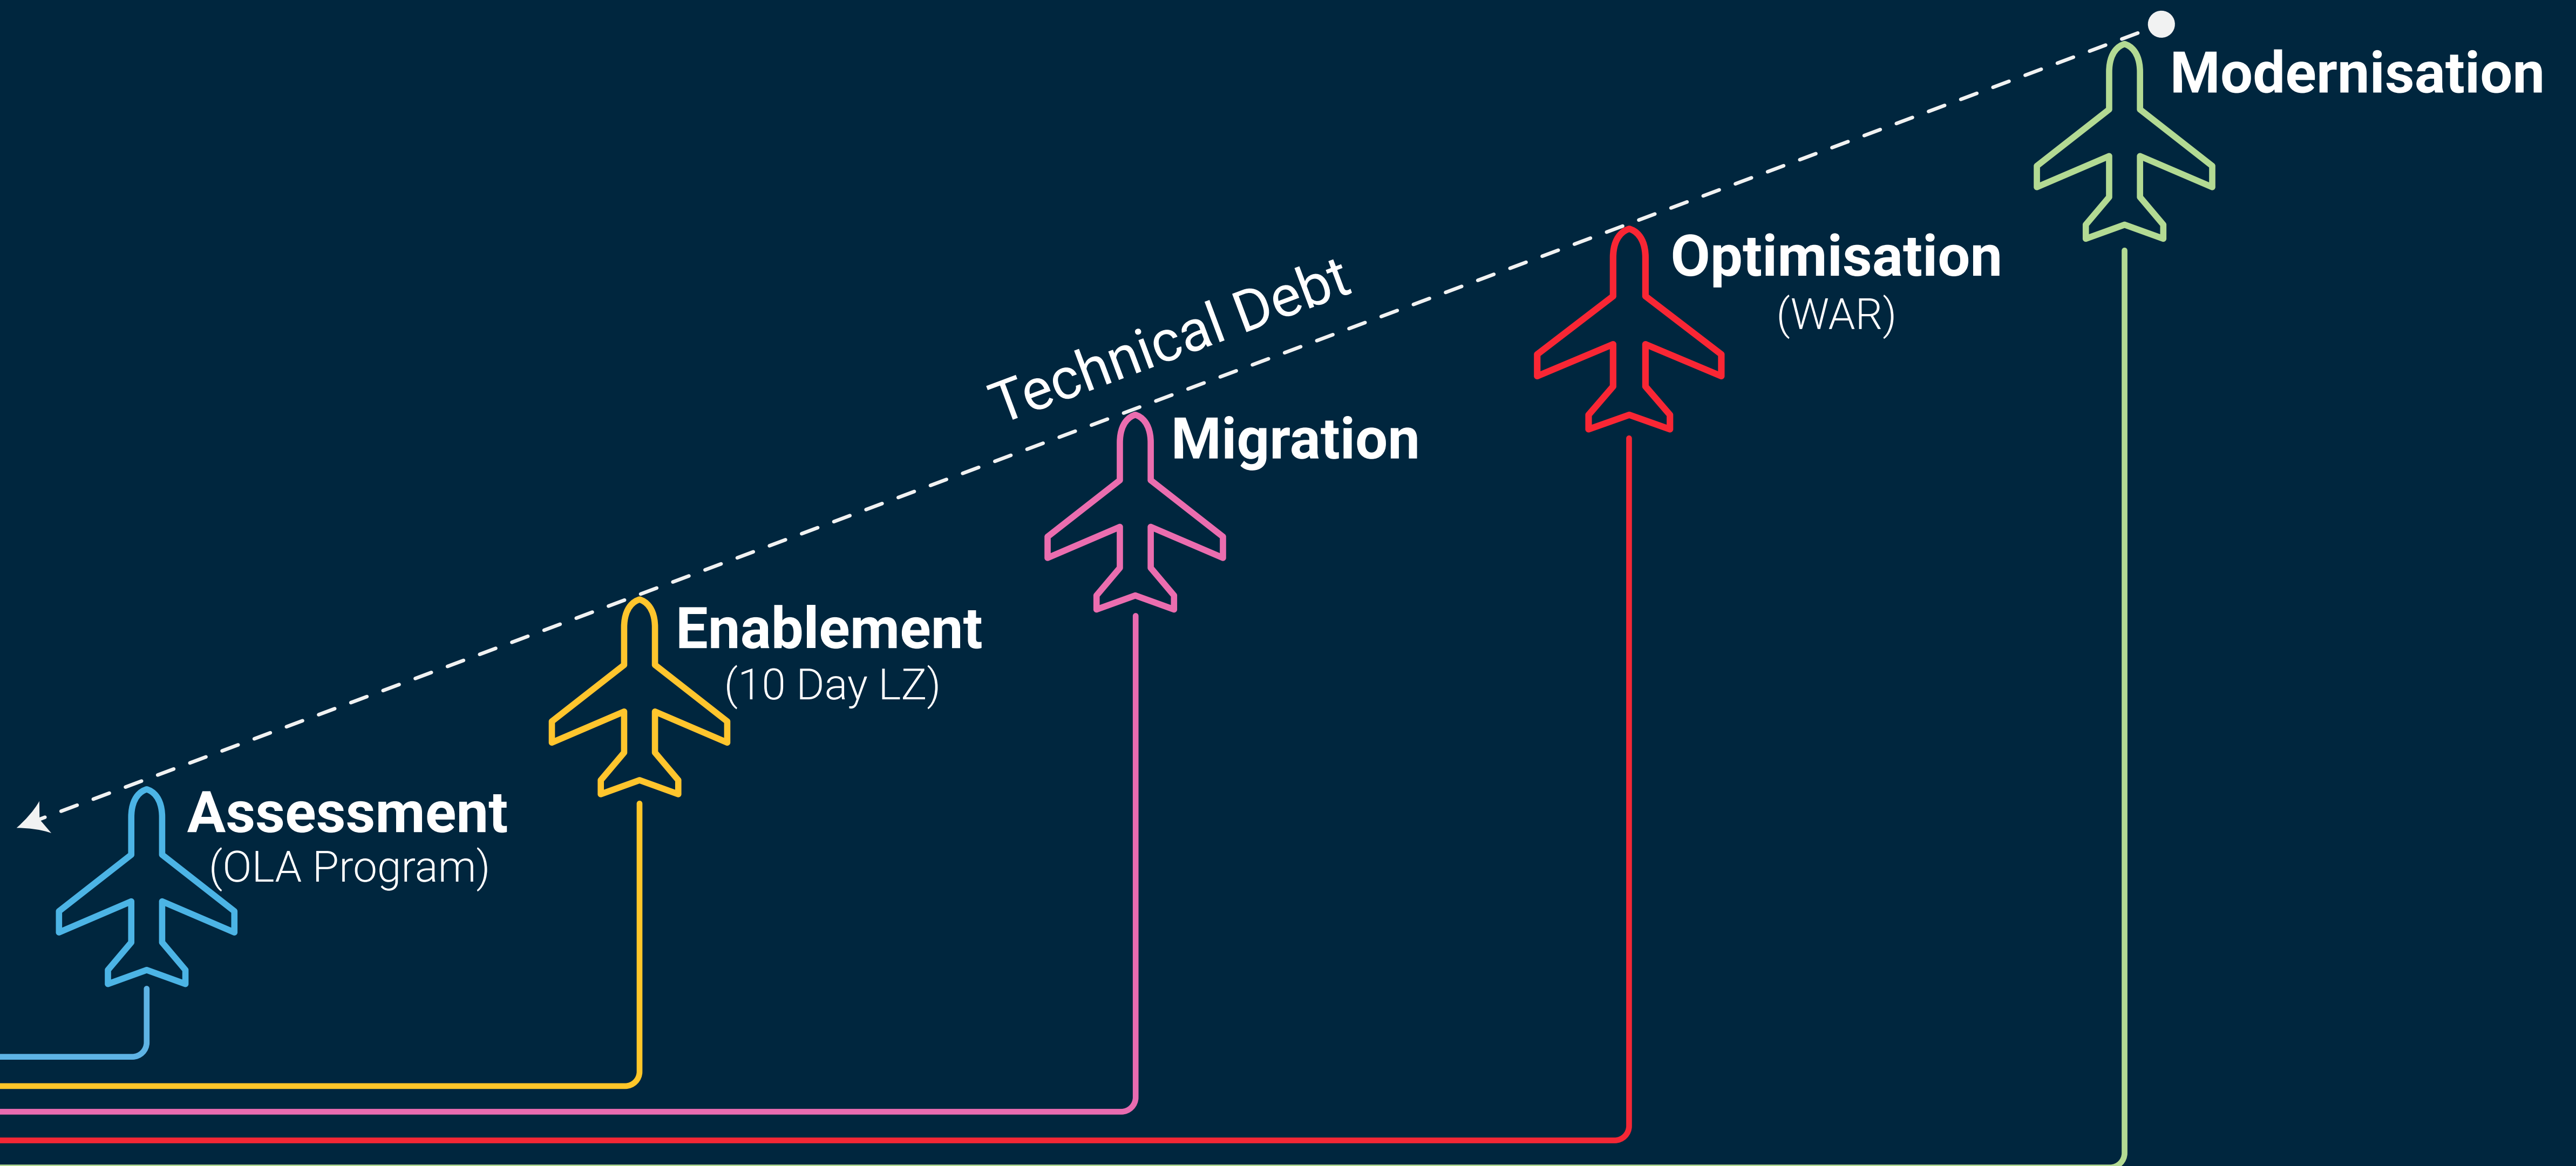

Cloud is fast becoming the standard.

Don't get left behind.

We can help you successfully navigate every stage of your journey.

Assessment - OLA Program

Start your journey with an Optimisation and Licensing Assessment (OLA)

We are offering this for FREE to accelerate your journey.

This is an essential on-premise server assessment including:

- Cost savings analysis
- Licensing recommendations
- A complete cloud migration strategy

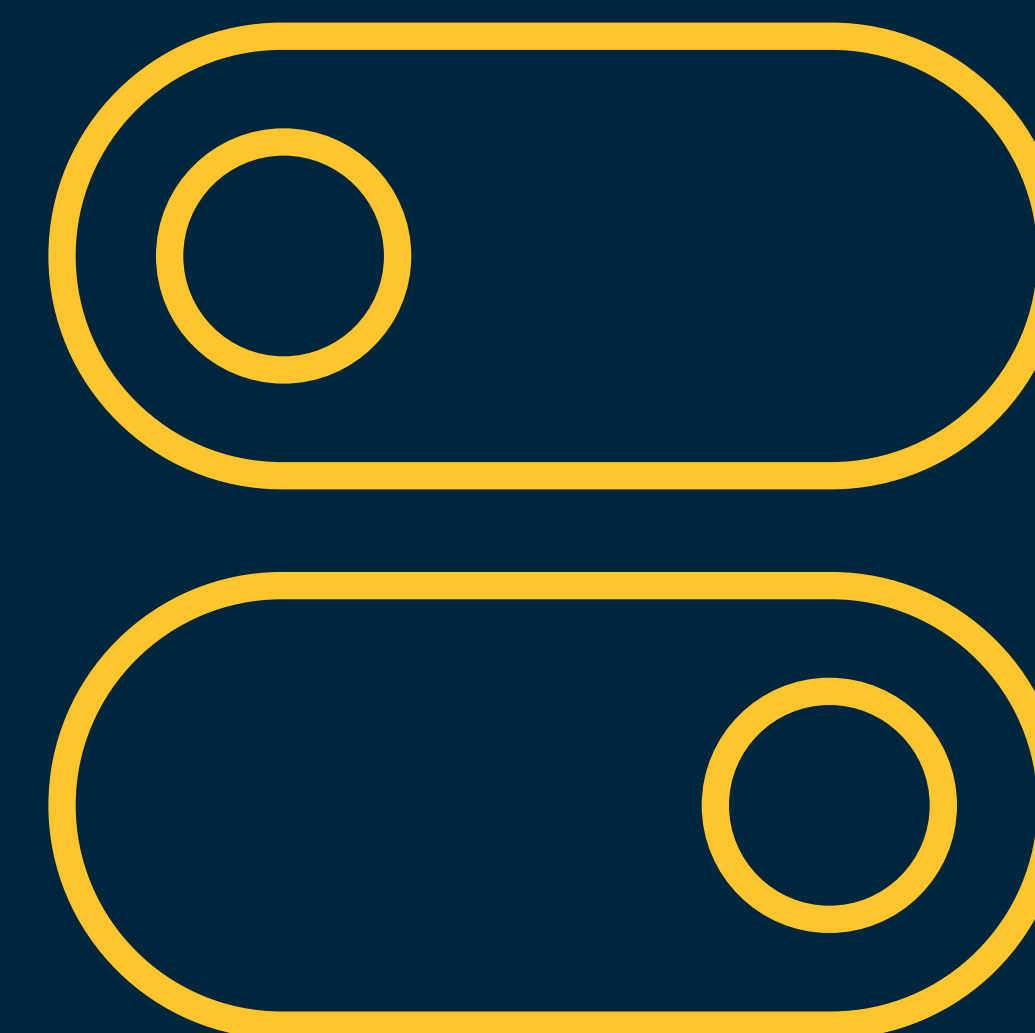

Enablement - 10 Day LZ

Let us enable you with
a 10 Landing Zone (LZ)

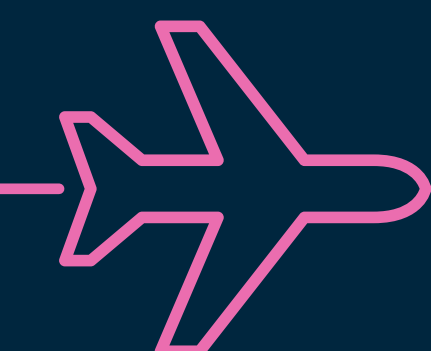

This launches you into the cloud in 10 days with:

- A baseline AWS environment
- Account structure
- Centralised networking
- Logging
- Governance
- Security

Migration

Once you're all setup with an **AWS Landing Zone** and ready to migrate your workloads, contact us to find out what offers we have available to ensure a smooth transition.

Optimisation

Once you are in the cloud, let us optimise your IT with a Cloud (Well-Architected) Review.

This is a cloud review valued at \$5 000 that we will give to you for FREE.

Expect a thorough review of your workload with suggestions for improvements based on best practises.

This review assesses:

- Operational excellence
- Security
- Reliability
- Performance efficiency
- Cost optimisation

Modernisation

Modernise your application to cloud-native services, Linux, or other open-source solutions to take advantage of substantial cost savings, freedom from restrictive licensing, increased performance, and access to rapid innovation.

Why Synthesis?

Because we understand the process.

Because we love to enable businesses.

And because cloud is ours.

We are an AWS Advanced Consulting Partner with years of cloud experience and over 180 certifications.

Our partnership allows us to pass on exclusive benefits to you.

We draw on our hundreds of hours from across industries and share our key findings to make cloud adoption simple, understandable and **most importantly successful.**

We ensure your team, from Finance to IT, is up skilled through our Synthesis Academy.

The Benefits?

We ensure you get every benefit and bypass all the blunders.

You will be ensured of:

- Greater platform security
- Scalability
- Increased reliability
- Cost flexibility
- An ability to service clients faster & more efficiently

Check out our latest case studies to learn more:

- Standard Bank seamlessly transitions to cloud
- GovChat and SASSA stretch the limits of cloud
- Synthesis migrates the AFGRI eAccounts banking platform to AWS in six months

“They were recommended by AWS and AWS recommends a handful of partners.”

With everyone moving to cloud, being left behind is not an option.

Let us help you take off.
